What went well / things you most liked about the program (Comments by trainees)

For each use case, there was a hands-on implementation that effectively reinforced the understanding of the topic. The facilitator was highly approachable, encouraging active participation by the students, which made the learning experience engaging and productive.

It was a fun and engaging session and felt like each moment was worth it. Also helped to learn a lot of new things and had fun while going through this whole learning process.

The trainer allotted sufficient time to clarify doubts, ensuring a thorough understanding of the topics covered, provided clarity on concepts through examples.

Explaining about the each topics was good, and the explaining of the related syntax was good .

What needs improvement / things you less liked about the program (Comments by trainees)

Including more assessments would further solidify application of the concepts

In my opinion, more classes are necessary.

Could give more exercises for each topic covered.

Duration was too short enough to learn all topics.
